TECHNICAL SYSTEM ARCHITECTURE & DESIGN SPEC

Sam's Culinary Art Classes

A comprehensive overview of sitemaps, navigation hierarchies, color tokens, typographical styles, layout responsiveness, dynamic search engine optimization structures, and integration points.

Live Domain: <https://www.samsculinaryartclass.com/> (Under Maintenance)

Hosting Platform: Vercel | Domain Provider: Spaceship

PREPARED BY

Dazzlers Pvt Limited

PREPARED FOR

Client & Development Team

DOCUMENT VERSION

v1.0.0 (Release-Ready)

DATE OF ISSUE

July 21, 2026

Sitemap & Navigation Hierarchy

The website is engineered as a modern, component-driven React web application. Page navigation and site routing are managed by React Router to deliver fast page transitions and a clean user experience.

Tab & Route Architecture

The navigation bar (Navbar) presents 6 primary pages (tabs), structured cleanly to support high user engagement. Some pages hold deep-linking drop-down submenus:

Tab Name	Hash Route Path	Submenu Options	Key Functional Content
Home	/	None	Hero banner, history timeline, statistics counts, testimonials, core features, visual montage.
About Us	/about	None	Founder bio (Mrs. Vahitha Jeevanandam), chronological growth story, TV partner credentials, certifications.
Courses	/courses	South Indian, North Indian, Continental, Multicuisine, Workshops	Detailed program cards, dynamic filtering, course description lists, key culinary skill highlights.
Gallery	/gallery	Dishes, Events, Achievements	Photo gallery grid with dynamic category switching, rich picture previews of courses and award ceremonies.
Careers	/careers	None	Open positions (Culinary Assistant, Studio Assistant, Desk Manager), detailed responsibilities, Apply Now.
Contact	/contact	None	Detailed contact card, WhatsApp link, embed Google Maps iframe, live inquiry form.

System Flow & Route Mapping

Figure 1.1: Logical flow of a user navigating the React client shell.

Design Tokens: Color & Typography

The visual interface features a premium, warm culinary-centric style. It supports both light and dark mode operations through CSS variable injection on the root HTML element.

Color Palette Swatches

Our curated palette ensures high readability, AAA accessibility, and a premium look. Below are the design tokens defined in the system styling:

 Forest Green #194121	 Mango Yellow #e8a710	 Light Green #eaf2eb	 Pastel Lemon #fced7e
 Lemon Light #fefcf0	 Text Dark #222222	 Text Muted #666666	 BG Gradient FDFBF7→F7F9F6

Typography Architecture

Google Fonts are integrated directly to create a visual hierarchy that reflects culinary expertise, elegance, and academic structure:

Marcellus (Serif)

HEADING ELEMENTS

Used for headings (H1, H2, H3, H4, H5, H6). Its clean, capital-centric classic Roman serifs deliver an upscale, academic, and professional look.

Montserrat (Sans-Serif)

BODY & CONTROLS

Used for primary copy, descriptions, navigation links, and inputs. It provides excellent legibility across all screen densities.

Playball (Script)

DECORATIVE ACCENTS

Used for cursive signature accents, brand taglines, and highlight clauses (e.g., "Since May 2013"). It injects custom artisanal flair.

Responsive Framework & Interactions

The frontend layout follows a mobile-first philosophy, utilizing responsive CSS grids, flexible flexbox directions, and media queries to adapt to any device width.

Adaptive Breakpoints & Rules

Layout adaptations are controlled via custom breakpoints that handle layout shifts, text sizes, and menu visibility:

Breakpoint Target	Device Width	Layout Adjustments	Component State
Mobile Portrait	<= 576px	1-column layout, reduced section padding, smaller headings.	Navbar menu collapses to a vertical slider. Hamburger icon visible.
Mobile Landscape & Tablets	577px - 768px	1-column or 2-column cards, maps display full-width.	Drawer remains toggled by state. Desktop margins reduced.
Desktop Standard	769px - 1200px	Grid layouts (3-column courses, 2-column about & contact).	Navbar menu items rendered inline. Hamburger icon hidden.
Desktop Wide	>= 1201px	Maximum page container width capped at 1200px , centered page.	Fixed header with blur backdrop. Full floating background bubbles.

Premium Micro-Animations

The layout incorporates micro-animations to enhance user interaction. All buttons, inputs, links, and cards feature high-performance CSS transition durations:

- ✓ **Theme Shift Transition:** Smooth 0.4s ease background, border-color, and color change transitions on body, cards, and input fields.
- ✓ **Interactive Cards:** Grid panels translate vertically by -6px and increase box shadow depth on hover with a 0.3s cubic-bezier curve.
- ✓ **Hamburger Menu:** Seamless CSS height and opacity transitions for mobile submenu overlays.
- ✓ **Floating Culinary Bubbles:** Slow-rotating blurred background vector shapes that add dimensional depth without impacting page loads.

Search Engine Optimization (SEO)

To maximize visibility, the application implements structured local business metadata alongside dynamic page title and keyword overrides.

1. Dynamic Metadata Management (useSEO React Hook)

A custom hook, `useSEO.js`, dynamically updates metadata properties in the document head when a route is mounted. It handles common search query misspellings:

```
import { useEffect } from 'react';

export default function useSEO({ title, description, keywords }) {
  useEffect(() => {
    if (title) document.title = title;

    let metaDesc = document.querySelector('meta[name="description"]');
    if (metaDesc) metaDesc.setAttribute('content', description);

    let metaKeywords = document.querySelector('meta[name="keywords"]');
    if (metaKeywords) metaKeywords.setAttribute('content', keywords);
  }, [title, description, keywords]);
}
```

2. Structured Data (JSON-LD LocalBusiness Schema)

Embedded directly within the root `index.html` is a JSON-LD payload. This provides search engine crawlers with direct access to physical location metadata:

```
{
  "@context": "https://schema.org",
  "@type": "School",
  "name": "Sam's Culinary Art Classes",
  "founder": {
    "@type": "Person",
    "name": "Mrs. M. Vahitha Jeevanandam"
  },
  "address": {
```

3. Rich Social Media Previews

The HTML head implements Open Graph (OG) tags and Twitter Card configurations. When links are shared on platforms like WhatsApp or Facebook, they display an official preview card with the logo, title, and description.

Technology Stack & Hosting Specs

Built using a modern web framework, the application utilizes optimized client-side bundles and maintains a production build pipeline for clean deployments.

Technology Stack Breakdown

Stack Layer	Technology & Version Used	Engineering Purpose
Core UI Library	React v18.3.1	Component-driven website interface logic.
Build Toolchain	Vite v5.4.8 & @vitejs/plugin-react	Fast development compiler and optimized production builds.
URL Routing	React Router DOM v6.26.2	Handles page routing and URL pathways across the site.
Visual Icons	Ant Design Icons v6.3.2	High-quality vector iconography.
Styling Core	Vanilla CSS (Custom design variables)	Zero-dependency, clean visual stylesheet.
Cloud Hosting	Vercel	Production server environment for high-performance serverless deployments.
Domain Registrar	Spaceship	Acquired domain registration and primary DNS nameserver router.
Production URL	<code>https://www.samsculinaryartclasses.com/</code>	Live production domain (configured with an "Under Maintenance" state temporarily).

Third-Party & System Integrations

The platform interfaces with several third-party services to handle external communications and recruiting pipelines:

Google Forms Integration

RECRUITMENT PORTAL

The Careers page application buttons deep-link directly to our secure Google Form: https://docs.google.com/forms/d/e/1FAIpQLSemLcbUIZiY1XSh1OaaMOu35TXrlw_fqitSFtrtYsCPSrT2KA/viewform. This routes applicants for the Culinary Assistant, Studio Assistant, and Desk Manager positions to a single centralized spreadsheet database.

Social Media & Communication Integrations

SOCIAL CHANNELS

- 1. WhatsApp Enquiry:** Links to <https://wa.me/918939648457>, passing a pre-filled text query to initiate direct enrollment chats.
- 2. Facebook & Instagram Channels:** Links to the official [SamsCulinaryArtClass](#) community handles.
- 3. Google Maps Location:** Embeds a responsive iframe connecting students to the Kodambakkam center.
